Entrance Systems

# Make sure your goods and customers have uninterrupted access

## In food and grocery stores, entrances are critical

When your business relies on regular deliveries of fresh goods, you need back entrances that are efficient and reliable. And at the front, your entrances have to be resilient enough to withstand the occasional cart collision, while guaranteeing people safe and easy access to your store.

If you do not have entrances that are optimal for your store, you could risk:

- Less traffic
- Delivery disruption
- Unwanted downtime

## Doors that keep up with your pace

### Fast opening doors can speed up the delivery process while welcoming customers through the front entrances

Specially engineered ASSA ABLOY entrances are designed to perform in busy environments, ensuring uninterrupted access to your store throughout the day. They can withstand bumps and knocks, and if you are short of space, our doors provide solutions that require little room while still retaining optimum performance.

### Your retail support team

Our teams of architect consultants, sales advisors and service technicians can offer expert advice throughout the entire building life cycle

# From rugged frame sliding doors to high performance interior doors, we have an entrance system to answer the issues your store faces

## Keep stock chilled

Insulated sliding doors with EcoDoor seals keep cool areas separate, ensure energy efficiency in your building and improve staff and customer comfort

## Secure your stock room

Automatic swing door systems with access control ensure only authorized staff can enter and that the door closes securely behind them

## Ensure smooth delivery

Every delivery is free of holdups with automated docking solutions. And you can reduce energy loss with insulated dock levelers and shelters

## Easy access for many people

Framed sliding doors that can withstand the wear and tear of cart collisions and intelligent directional sensors that ensure automatic doors only open when they need to, meaning that customers are welcomed throughout the day while also regulating your indoor temperature

## Safe, efficient access

Between stock room and the shop floor, a fast-acting high-performance door will ensure safe and efficient operations by keeping customers separate from staff operating pallet machines

ASSA ABLOY Entrance Systems is a leading supplier of entrance automation solutions for efficient flow of goods and people. Building on the long-term success of the Besam, Albany and Megadoor brands, we offer our solutions under the ASSA ABLOY brand. Our products and services are dedicated to satisfying end-user needs for safe, secure, convenient and sustainable operations. ASSA ABLOY Entrance Systems is a division within ASSA ABLOY.
